

Tetra Pak Aseptic Filling Line Spare Parts Support

CADA SPARES | CADA GROUP LIMITED | Spare parts request support

This compact PDF helps buyers prepare a clearer spare parts request for aseptic filling line components. Start with whatever information is available. One useful detail is enough for initial checking; more details can be added after the first reply.

Supported platforms

- TBA19, TBA22, TBA21 and TBA8 aseptic filling lines
- A3 Flex, A3 Speed and related aseptic filling platforms
- E3, CAP30, TSA21, SA30 and selected downstream modules
- Requests can be checked by model, exact version, part number, label photo, worn-part photo or visible symptom

Common spare parts categories

Category	Typical request scope
Sealing / jaw system	Cutting jaws, pressure jaws, knives, anvils, jaw wear parts and cross-seal related components.
Strip / longitudinal seal	LS strip handling parts, strip applicator components, guide rollers, heaters, squeeze rollers and sensors.
Sterilization / H2O2	H2O2 pumps, peroxide nozzles, bath-related parts, spray-related parts and alarm-related replacement components.
Final folder / package forming	Final folder wheels, package forming parts, packer belts, guides and package stability components.
Sensors / controls	Photocell sensors, encoder-related parts, switch parts, electrical modules and control-related replacement items.
Change parts / downstream	CAP30, TSA21, SA30, cap applicator, straw applicator, conveyor and change-part related components.

Useful information for checking

- Machine model or platform
- Part number, OEM number, label photo or nameplate photo if available
- Photo of the worn or broken part, or a short symptom video
- Package size, package family, cap/straw/opening type or running speed if relevant
- Visible symptom, alarm text or HMI screenshot if available
- Quantity, delivery destination and timing if already known

Supply options

Depending on the component and the request, CADA SPARES can coordinate original route, OEM route, compatible spare parts or cost-sensitive matching. Final matching is confirmed through inquiry.
